FOREWORD

This publication provides data on U.S. merchandise trade with each major trading partner and region, presenting time series data in SITC Revision 3 format which is based on the Harmonized System (HS) of commodity classification. This report is the only U.S. Department of Commerce publication available that provides detailed commodity data for exports and imports that are consistent over the entire time period.

The commodity data for 1989 and 1990 are reported by the U.S. Bureau of the Census on the HS basis. The pre-1989 commodity data in this report were converted to an HS basis using official Census Bureau data concordances and allocations.

The publication also contains an overview summarizing major U.S. trade trends in 1990. Emphasis is on aggregate exports and imports, U.S. commodity and country/regional trade balances, and shifts in the commodity composition of U.S. exports and imports.

A summary table presents U.S. foreign trade data with the world for total merchandise, manufactures, and agricultural products in 1970-90. Additional tables present similar data on U.S. foreign trade with each country and major regions in 1984 through 1990. Also included are tables showing the top 50 U.S. export markets, the top 50 foreign suppliers, the top 50 partners in U.S. foreign trade, as well as the top 50 surplus and deficit countries in U.S. bilateral trade.

U.S. exports and imports by commodity at the 1-digit and 3-digit levels are presented for most U.S. trading partners and regions for 1986-90. The 3-digit commodity data are presented in descending order of magnitude, ranked by importance in 1990. All pre-1989 country and regional commodity data (unless noted otherwise) exclude trade in military goods.

Barbara N. McLennan
Deputy Assistant Secretary
for Trade Information and Analysis

Index to U.S. Commodity Trade Tables 63

U.S. MERCHANDISE TRADE OVERVIEW

- The U.S. merchandise trade situation continued to improve in 1990 for the third consecutive year (Figure 1). The trade deficit (exports f.a.s.; imports Customs value) fell from $109 billion in 1989 to $101 billion in 1990 – the lowest trade deficit since 1983.

- U.S. merchandise exports reached a record level of $394 billion in 1990, growing 8 percent over the 1989 level of $364 billion. Strong economic growth abroad in 1990 and earlier dollar depreciation continued to buoy foreign demand for U.S. exports.

    - Overall export growth was paced by sales of manufactured goods (accounting for 80 percent of total exports), which grew by 10 percent in 1990 (Figure 2). Among manufactures exports, aircraft, and motor vehicle parts exports showed the strongest gains, growing by one-fourth. Exports of ADP equipment and parts, television receivers, scientific instruments, and telecommunications equipment and parts also expanded significantly. The European Community (EC), Japan, and Mexico accounted for most of the increase in manufactures exports.

    - Sales of agricultural products fell by 5 percent in 1990. The decrease resulted from a sharp decline in wheat shipments and lower sales of corn and soybeans. The decreases offset a sizable gain in exports of tobacco.

    - As a result of higher world oil prices, exports of refined petroleum products grew substantially in 1990.

    - Canada, Japan, Mexico, the United Kingdom, and Germany were the top markets for U.S. exports, accounting collectively for more than 50 percent of total exports in 1990.

- U.S. imports increased to $495 billion in 1990--almost 5 percent above the 1989 level. Import growth slowed despite the surge in the value of oil imports during the last four months of the year.

    - Imports of petroleum and products accounted for 54 percent of the growth in total imports in 1990. These imports grew 22 percent in value due to sharply higher import prices and a small increase in volume. The average price per barrel of imported oil in 1990 was $20.34, a $3.53 per barrel rise from the previous year. The quantity of petroleum imported grew from 8.0 million barrels per day (mmbd) in 1989 to 8.2 mmbd in 1990.

    - U.S. purchases of manufactured goods accounted for virtually all of the remaining increase in imports. Import growth was paced by higher arrivals of ADP equipment, footwear, clothing, nonelectric engines, electrical switchgear apparatuses, and aircraft. Products which in previous years contributed significantly to the growth in manufactures imports, such as motor vehicle parts, television receivers, and automobiles from Japan, declined in 1990.

- U.S. bilateral trade balances improved with developed countries, the major U.S. trading group, but deteriorated with the less developed countries—mainly OPEC countries—in 1990 (Figure 3).

  – The surplus with the European Community expanded from $1 billion in 1989 to $6 billion in 1990.

  – Lower U.S. imports and higher exports led to a 16 percent decline in the deficit with Japan to $41 billion in 1990. Despite the decline, the deficit with Japan was still the largest bilateral U.S. trade deficit.

  – The deficit with the East Asian newly industrialized countries (NICs) shrank from $24 billion in 1989 to $20 billion in 1990, while the deficit with China reached $10 billion, to become the third largest U.S. bilateral deficit, after Japan and Taiwan.

  – As a result of sharply higher world oil prices, the deficit with OPEC countries jumped from $17 billion in 1989 to $24 billion in 1990.

METHODOLOGY AND DEFINITIONS

Methodology: This publication reports U.S. exports (domestic merchandise and foreign merchandise or reexports, f.a.s. valuation basis) and U.S. imports (general imports, Customs valuation basis). The data are not seasonally adjusted. Revised Census data are presented whenever possible.

The 1990 Census data concordances and definitions were used to link the trade figures into consistent time series based on the Harmonized System (HS) of commodity classification. As a result, the pre-1989 data in this report are estimations based on Census Bureau concordances and allocations that approximate data based on the HS-based Standard International Trade Classification, Revision 3 (SITC Rev. 3) commodity codes.

Definitional Note: When necessary, country and regional foreign trade data were adjusted to create data series that utilize the same country definitions over time.

The developed countries of the world include Canada, Japan, all the countries of Western Europe, Australia, New Zealand, and the Republic of South Africa. Through 1987, exports to Australia also include shipments to Christmas, Norfolk, Cocos, Heard, and McDonald Islands; exports to New Zealand also include trade with the Cook, Tokelau, and Niue Islands. However, imports from Australia and New Zealand exclude trade with these island dependencies. Beginning with 1988 data, trade with Australia and New Zealand (both exports and imports) exclude trade with these island dependencies.

The European Community (EC-12) includes Belgium/Luxembourg, Denmark (excluding Faroe Islands after 1987), France (excluding Andorra and Monaco after 1987), Germany (both East and West), Greece, Ireland, Italy (excluding San Marino and Vatican City after 1987), Netherlands, Portugal (including Azores and the Madeira Islands), Spain (including Spanish Africa and the Canary Islands), and the United Kingdom.

The non-EC countries in Western Europe include Austria, Cyprus, Finland, Gibraltar, Iceland, Malta, Norway (excluding Svalbard and Jan Mayen Island after 1987), Sweden, Switzerland (excluding Liechtenstein after 1987), Turkey, Yugoslavia, and, after 1987, other non-EC Europe (Andorra, Faroe Islands, Liechtenstein, Monaco, San Marino, Svalbard and Jan Mayen Island, and Vatican City).

The developing countries (LDCs) include all countries except the developed countries and the other economies. Cambodia, Cuba, and Laos are considered to be other economies and not developing countries.

The Western Hemisphere LDCs include all countries of the Western Hemisphere except for Canada, Cuba, and the United States. The countries of South America are Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Falkland Islands, French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, and Venezuela. Guyana and Suriname are also included within the Caribbean Basin.

The Caribbean Basin countries consist of the Bahamas, Barbados, Belize, Cayman Islands, Costa Rica, Dominican Republic, El Salvador, Guatemala, Guyana, Haiti, Honduras, Jamaica, Leeward and Windward Islands (i.e., Antigua, British Virgin Islands, Dominica, Grenada, Montserrat, St. Christopher-Nevis and Anguilla, St. Lucia, and St. Vincent), Netherlands Antilles and Aruba, Nicaragua, Panama, Suriname, Trinidad and Tobago, and Turks and Caicos Islands. The other developing countries of the Western Hemisphere include Bermuda, French West Indies (i.e., Guadeloupe and Martinique), Greenland, and St. Pierre and Miquelon.

The East Asia newly industrialized countries (NICs) include Hong Kong, Singapore, South Korea, and Taiwan. The other developing countries of Asia are Afghanistan, Bangladesh, Brunei, Burma, India, Indonesia, Macao, Malaysia, Nepal, Pakistan, Philippines, Sri Lanka, Thailand, and Southern Asia NEC (not elsewhere classified). Southern Asia NEC includes Bhutan and Maldive Islands.

In Africa, French Indian Ocean areas include Reunion and French Southern and Antarctic Lands. Western Africa NEC includes Cape Verde, Guinea-Bissau, and Sao Tome and Principe.

Other developing countries consist of the remaining LDCs: Australian island dependencies (i.e., Christmas Island, Cocos Island, Heard and McDonald Islands, and Norfolk Island), French Pacific Islands (i.e., French Polynesia, New Caledonia, and Wallis and Futuna), New Zealand island dependencies (i.e., Cook Islands, Niue, and Tokelau Islands), Papua New Guinea, Southern Pacific Islands (i.e., Kiribati, Pitcairn Island, Solomon Islands, Tuvalu, and Vanuatu), Former Trust Territory (i.e., Federated States of Micronesia, Marshall Islands, and Palau), Western Samoa, and Other Pacific Islands NEC (i.e., Fiji, Nauru, and Tonga).

The other economies include China, the USSR, Eastern Europe, Cambodia, Cuba, Laos, Mongolia, North Korea, and Vietnam. Eastern Europe includes Albania, Bulgaria, Czechoslovakia, Hungary, Poland, and Romania; Yugoslavia is considered part of Western Europe.

Note: Compiled from official statistics of the U.S. Department of Commerce. Includes revisions to 1988 and 1989 data. Data for 1983-1988 are estimated, based on the Harmonized System of commodity classification. Data before 1983 are on a Schedule A/E basis and have been adjusted to match the 1990 trade definitions as closely as possible. Parentheses indicate negative values.

1/ Includes nonmonetary gold, military grant aid, special category shipments, trade between the U.S. Virgin Islands and foreign countries, and undocumented exports to Canada. Adjustments were also made for carryover. Import values are based on transaction prices whenever possible ("f.a.s." for 1974-1979 and Customs value thereafter). Import data before 1974 do not exist on a transaction price valuation basis.

2/ Manufactured goods include commodity sections 5-9 under Schedules A and E for 1970-1982 and SITC Rev. 3 for 1983-1990. Manufactures include undocumented exports to Canada, nonmonetary gold (excluding gold ore, scrap, and base bullion), and special category shipments.

3/ Data for 1970-1980 exclude trade between the U.S. Virgin Islands and foreign countries. Census data concordances link the 1980-1990 trade figures into time series that are as consistent as possible. Data for 1970-1979 are not linked and are from published sources. Import values are "f.a.s." for 1974-1979 and Customs value thereafter; these values are based on transaction prices while maintaining a data series as consistent as possible over time. Import data before 1974 do not exist on a transaction price valuation basis.

4/ Agricultural products for 1983-1990 utilize the 1990 Census definition that excludes manufactured goods that were previously classified as manufactured agricultural products.

5/ These data for 1983 are on the old (non Harmonized System) basis of commodity classification.

NOTE: Country and regional totals for 1988 and 1989 are revised. Data for 1990 do not include final revisions. All export data include special category or military type goods and undocumented shipments to Canada. Because of rounding, aggregations may differ slightly from values in other published sources.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ World totals include all Census revisions.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
6/ Including pistols and revolvers through 1986.
7/ Including transshipments, carryover adjustments, and revisions not accounted for elsewhere.
8/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the methodology section for a description of these changes.

NOTE: Country and regional totals for 1988 and 1989 are revised. Data for 1990 do not include final revisions. Because of rounding, aggregations may differ slightly from values in other published sources.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ World totals include all Census revisions.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
7/ Including carryover adjustments and revisions not accounted for elsewhere.
8/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the methodology section for a description of these changes.

NOTE: Country and regional totals for 1988 and 1989 are revised. Data for 1990 do not include final revisions. All export data include special category or military type goods and undocumented shipments. Because of rounding, aggregations may differ slightly from values in other published sources.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ World totals include all Census revisions.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
6/ Including pistols and revolvers through 1986.
8/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the methodology section for a description of these changes.

Note: All export data include special category or military type goods and undocumented shipments. Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, data in this table will differ from values in other sources. Data for the world and for Canada are revised; other country and regional totals are unrevised. Data for 1990 do not include final revisions.

The 1990 manufactures export figures for Canada and developed countries were derivatively revised, based on the Census Bureau revising the 1990 total manufactures value (+$899.3 million) and reporting that only export data for Canada were revised.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Manufactured goods are defined as SITC (Revision 3) 5-9.
Includes undocumented exports to Canada.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
6/ Includes pistols and revolvers through 1986.
7/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the methodology section for a description of these changes.

NOTE: Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, data in this table will differ from values in other sources. Data for the world and for Canada are revised; other country and regional totals are unrevised. Data for 1990 do not include final revisions.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Manufactured goods are defined as SITC (Revision 3) 5-9.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
7/ Country definitions changed in 1988 thereby breaking the time series at 1987. Refer to the methodology section for a description of these changes.

Note: All export data include special category or military type goods and undocumented shipments. Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, data in this table will differ from values in other sources. Data for the world and for Canada are revised; other country and regional totals are unrevised. Data for 1990 do not include final revisions.

The 1990 manufactures export figures for Canada and developed countries were derivatively revised, based on the Census Bureau revising the 1990 total manufactures value (+$899.3 million) and reporting that only export data for Canada were revised.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Manufactured goods are defined as SITC (Revision 3) 5-9.
Includes undocumented exports to Canada.
2/ Excluding Cambodia, Cuba, and Laos.
3/ Excluding Cuba.
4/ Excluding Cambodia and Laos.
5/ Including Cambodia, Cuba, and Laos.
6/ Includes pistols and revolvers through 1986.
7/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the methodology section for a description of these changes.

NOTE: Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, the data in this table will differ from values in other published sources. Except for 1990, the world total is revised; country and regional totals are unrevised. Excludes manufactured agricultural products.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Excluding Cambodia, Cuba, and Laos.
2/ Excluding Cuba.
3/ Excluding Cambodia and Laos.
4/ Including Cambodia, Cuba, and Laos.
5/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the data methodology section for a description of these changes.

NOTE: Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, the data in this table will differ from values in other published sources. Except for 1990, the world total is revised; country and regional totals are unrevised. Excludes manufactured agricultural products.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Excluding Cambodia, Cuba, and Laos.
2/ Excluding Cuba.
3/ Excluding Cambodia and Laos.
4/ Including Cambodia, Cuba, and Laos.
5/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the data methodology section for a description of these changes.

NOTE: Data before 1989 are estimated, based on the Harmonized System of commodity classification. As a result and because the most recent Census data concordances have linked the trade figures into consistent time series, the data in this table will differ from values in other published sources. Except for 1990, the world total is revised; country and regional totals are unrevised. Excludes manufactured agricultural products.

Parentheses indicate negative values.
"NA" indicates data do not exist.
"0" indicates trade values less than $500,000.

1/ Excluding Cambodia, Cuba, and Laos.
2/ Excluding Cuba.
3/ Excluding Cambodia and Laos.
4/ Including Cambodia, Cuba, and Laos.
5/ Country definitions changed in 1988 thereby breaking the time series at 1987.
Refer to the data methodology section for a description of these changes.
